AMS Achieves HITRUST CSF® Certification to Further Mitigate Risk in Third-Party Privacy, Security, and Compliance

Lynnfield, MA – AMS (Advanced Medical Strategies), the leading healthcare IT platform that provides clinical insights and financial analysis of the costliest and most complex medical diagnoses, today announced that it has earned Certified status for information security by HITRUST pertaining to the following: the Predict Suite, FACS, Profiler, its Professional Services, and their SFTP Server.

“At AMS, our top priority is to ensure information and data accessed through our Predict Platform adheres to the highest levels of security and protection. We’re passionate about data management and the HITRUST certification strengthens our reputation of adhering to the most stringent and secure policies and processes in the marketplace,” states Jay Donoghue, Chief Information Officer at AMS.

HITRUST CSF Certified status demonstrates that the organization’s Predict Suite, FACS, Profiler, Professional Services, and SFTP Server have met key regulations and industry-defined requirements and is appropriately managing risk. This achievement places AMS in an elite group of organizations worldwide that have earned this certification. By including federal and state regulations, standards, and frameworks, and incorporating a risk-based approach, the HITRUST CSF helps organizations address these challenges through a comprehensive and flexible framework of prescriptive and scalable security controls.

“HITRUST is continually innovating to help streamline and simplify how organizations assess information risk and manage compliance in a cloud environment,” said Jeremy Huval, Chief Compliance Officer, HITRUST. “We are happy that AMS has taken the steps needed to achieve HITRUST CSF Certification—a designation which provides added confidence to their customers.”

About AMS

Founded in 2003, AMS (Advanced Medical Strategies) is a healthcare IT company focused on providing clients with payment intelligence that identifies, analyzes and reports on the 5% of members responsible for 50% total medical spend. Our AI-powered Predict Platform combines clinical insights and financial analysis of the costliest and most complex medical diagnoses our clients rely on to guide enterprise-wide initiatives. We believe that “Knowledge is Power”. www.mdstrat.com
